

QWO TREATMENT CONSENT FORM

I _____ understand that by signing below, I acknowledge

and agree that: QWO is a prescription medicine used for the treatment of moderate to severe cellulite in the buttocks and thigh area of adults. It is not known if QWO is safe or effective in children. The QWO treatment consists of three treatment visits where treatment should be repeated every 21 days. If I do not receive three treatments, my results will not be optimal. In some patients an additional treatment may be needed.

The QWO treatment does not treat laxity, only cellulite dimples. We can not guarantee what the dimple will look like once it is injected with QWO.

The results are permanent with a combination of optimal diet, exercise and lifestyle changes. The development of cellulite is multifactorial.

Do not receive QWO if you:

*Are allergic to any collagenase clostridium histolyticum

Active ingredient: Collagenase clostridium histolyticum

Inactive ingredient: Mannitol, sucrose, tromethamine, and hydrochloric acid

The diluent contains: Calcium Chloride dihydrate, sodium chloride, and water for injection, USP

Tell your healthcare provider about all of the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Especially tell your healthcare provider if you take a medicine that prevents the clotting of your blood (antiplatelet or anticoagulant medicine).

QWO may cause serious side effects including, Allergic (hypersensitivity) reactions, including anaphylaxis. Call your healthcare provider or 911 right away if you have any of the symptoms of an allergic reaction after an injection of QWO:

*hives *swollen face *trouble breathing *chest pain *low blood pressure *dizziness or fainting

The most common adverse reaction were related to the injection site (bruising, pain, nodule, pruritus, erythema, discoloration, swelling, and warmth)

Injection site bruising. YOU WILL Bruise.

The most common side effects of QWO include: bruising, pain, areas of hardness, itching, redness, discoloration, swelling and warmth in the treatment area.

These are not all of the possible side effects of QWO. Call your doctor for medical advice about side effects. You may report side effects to the FDA at 1-800-FDA-1088.

General information about QWO Medicines are sometimes prescribed for purposes other than those listed in a patient information leaflet. If you would like more information, talk to your healthcare provider. You can ask your pharmacist or healthcare provider for more information about QWO that is written for health professionals.

Before receiving QWO tell your healthcare provider about ALL of your medical conditions including if you have had an allergic reaction to a QWO injection in the past.
