

Eyeliner Permanent Makeup Procedure After Care

1. Day Nr.1 (Day of the procedure)

- Do not touch the eyes. Before bed you can ice the eyes by applying it over a clean cloth. Do not apply ice directly on skin.
- Do not wash the eyes, try to keep them dry
- If the eyes are swollen you may take a tylenol.

2. Day Nr.2

- The eyes may be swollen the next day after the procedure, it is a normal reaction, some clients swell more than others. The swelling should start going down during this day and the eyes should be looking better by the end of the second day.

3. Day NR. 3

- If the skin feel very dry by day 3 you can apply a very thin layer of Aquaphor Healing Ointment(you can find it in any grocery stores in the kids section). Do not apply too much to avoid adverse reactions. Wash your hands before applying ointment.

During Day 1 to Day 7 or even longer(until the scabs are gone) **AVOID** water(for the PMU area) , makeup , excessive sweating , no sauna, no pools, no sunbathing, do not **PEEL** the scabs at all(you may cause scarring if otherwise)

Do not apply anything besides Aquaphor ointment such as vaseline, antibiotic creams, neosporin etc. Grapeseed oil may be used to substitute aquaphor.

During 4 weeks after the procedure is best to not use creams that contain acids or ingredients that will lighten or exfoliate the skin.

The touch up is best to be done 6 weeks later and allow extra time for clients that heal longer, also give extra healing time for mature clients as well.
